

Chapter 1 - INTRODUCTION

Rationale :

Local government units are mandated to provide basic services to promote the overall development of the community and its people. However, it is a reality that most rural communities do not have the financial capability to implement the identified demand driven programs and projects. Hence, the need to prioritize the projects in order to maximize the utilization of limited funds.

Objective of the Plan

The plan is primarily aimed at presenting and appreciating the existing situation by the barangay people themselves, analyzing the situation using standards and other means of measurement to come up with identification of needs and corresponding interventions.

Scope of the Plan

The scope and coverage of the plan is limited to the Barangay of Kibuaya , Hagonoy, Davao del Sur for the period of five (5) years. The plan is composed of two (2) parts, the barangay profile which is the result of the participatory rural appraisal which defines the collective ideas of the residents in terms of the history, culture and traditions, and resources as well as their strengths, weaknesses, opportunities and threats. The second part is the Barangay Development Plan that starts with the expression of the collective vision and mission and presentation of their sectoral programs and projects.

Planning Methodology

The participatory approach in plan formulation was used giving weight to the data and experiences shared by the workshop participants. The data and information were provided by the people themselves and processed using the PRA tools. However inspite of this, we still cannot avoid mistakes and deficiencies.

This effort is just the beginning of an organized and orderly journey towards development.

Chapter 2 - BARANGAY PROFILE

2.1 Historical Background

Barangay Kibuaya is one of the 21 barangays of the Municipality of Hagonoy, Davao del Sur. It was created on May 28, 1958. It is an agriculturally based barangay that can be reached by a motorcycle, PUJ, and heavy trucks. Most of our products have been transported To Digos City and Davao City. The first settlers here were the K'lagans and Cebuanos.

Kibuaya is surrounded by Barangay Sinaragan, for North Sinayawan for the east. Lanuro for the west and Sacub for the South.

Kibuaya is the original name of this Barangay since it was created.

2.2 Demographic Profile

Table 1. Population size, growth and density

Total Population	1,852
Total No. Of HH	366
Average HH Size	5
Density	370.40
Growth Rate	

Source BNS

Population size, growth rate, average family size as of the latest NSO population census showed that Barangay Kibuaya has a total of (1,852) population, with a total household of (366) and it has an average of 5.06 % annually. (see table 1 above)

The low growth rate may be attributed to the limited job opportunities open to available labor force. Hence, skilled workers and college graduate seek for greener pastures outside of the barangay.

Table 2. Distribution of Population

Sitio Name	Population		No. of HH
	Male	Female	
Purok 1	96	75	32
Purok 2	176	139	62
Purok 3	98	83	36
Purok 4	153	150	57
Purok 5	224	209	93
Purok 6	131	133	51
Purok 7	92	83	35

Source : Barangay Survey

The population and households are distributed in the seven (7) puroks with most households located in puroks Purok 5 and Purok 2. The least number of households reside in purok 7. The concentration of households in purok 2 is attributed to its accessibility to institutional facilities, such as the Barangay Hall, Elementary school, Barangay Health Station and Chapel as well as the Barangay site where the households were relocated. (see table - 2 above)

Table 3. Age and Sex Distribution

Age Group According to Sex	Gender	
	Male	Female
Children 0 - 5	122	118
Children 6 - 12	144	149
Children 13 - 17	126	92
Adult 18 - 35	245	199
Adult 36 - 50	271	231
Adult 51 - 65	16	21
Adult 66 yrs old & above	30	34

Source : Barangay Survey

The barangay population is predominantly composed of young people aged 18-35 with males slightly more than females. (see table - 3 above) . It shows that the Barangay has to provide more services and facilities intended for young people.

Table 4. Marital Status

Civil Status (ex. Single, married, etc)	Population
Single	494
Married	632
Widow	30
Widower	20

Source: Barangay Survey

More married than single or unmarried persons are identified in this barangay compared to widower persons . There are no reported live-in partners and have 30 widows and 20 are widowers.

Table 5. Population by Mother Tongue

Types of Dialect (ex. Cebuano, Tagalog, Ilonggo, etc.)	Population
Cebuano	1240
Ilongo	74
Tagalog	19
Ilocano	19

Source: Barangay Survey

The population of Barangay Kibuaya is homogeneous as majority of the population are Visayans with more than eighty percent (80%) speaking the Cebuano dialect followed by the Calagans, Ilongos, and Warays. (see table - 5 above)

Table 6. Ethnic Groups

Types of Ethnic Groups (ex. Bagobo, manobo, etc)	Population
K'lagan	185
B'laan	93
Bagobo	10

Source : Barangay Survey

The common dialect used in Barangay is Cebuano. With a total of 1,240. Some of the residents tagalong dialect 19, Ilocano and Ilonggos is 74.

Table 7. Religious Affiliation

Types of Religion (ex. Islam, etc.)	Population
Roman Catholic	1,837
UCCP	15

Source : Barangay Survey

Almost ninety percent (90%) of the population embrace the catholic faith. The remaining ten (10%) percent belong to UCCP religion (see table-7 above)

Table 8. Labor Force/Employment

Types of Employment	Population
Driver	143
Overseas	14
Carpenter	17
Laborer	143
Mason	3
Manicurist	2

Source : Barangay Survey

Most of the population in the Barangay are farmers and Laborers. The others engaged in Driving, Carpentry vocations either in part-time or full time basis particularly during Saturdays & Sundays. (see table - 8 above)

Table 9. School Age Population Distribution

Classification	No.
06-14 years old (elementary school-going age)	337
13-16 years old (secondary school-going age)	95
17-21 years old (tertiary school-going age)	202
Others Out of School Youth	115

Source: Barangay Survey

As shown in the Table - 9 above, a greater number of children of school-going age are 06-14 yrs. old , and we have 115 out-of-school specially in the secondary and tertiary levels of education. The reasons may be attributed to poverty, lack of interest, and parental encouragement. During weather in good condition the parents forced their children to skip classes to help them in chores to augment family income. With long absences in school they become disinterested and ultimately drop from school. The situation added to the problem of child-labor and abuse the rights of the children

2.3 BIO-PHYSICAL CHARACTERISTICS

A. Natural Features

i) Geographical Location

a. Distance from Poblacion: 8 km.

b. Neighboring Boundaries

b.1 North Sinaragan
 b.2 East Sinayawan
 b.3 West Lanuro
 b.4 South Sacub

ii) Land Area: 516 has.

Elevation, Topography and Slope Characteristics (especially for NRM areas)

The topography of the Barangay is plain. From the Poblacion going to the area is considered as plain.

Table 10. Surface Drainage

NAMES OF MAJOR WATER BODIES WITHIN THE BARANGAY	PHYSICAL CONDITION
Creek	No proper exit
Dainage Canal	No proper exit

Source : MPDO

a) Climate and Rainfall:

Rainfall Temperature

The prevailing climate in the municipality is characterized by an even distribution of wet and dry seasons. Major seasonal variation are not so pronounced. The wet months start usually from June and end in October, while from November to May are generally dry seasons.

Table 11. Soil Type

SOIL TYPE NAME	AREA
Loam	469 has.
Sandy	52 has.
Clay Loam	15 has.

The soil in Barangay Kibuaya is generally described as hilly . The very common soils is the Loam because of its closeness to the hill.

Table 12. Land Capability

CLASSIFICATION	AREA
Soil depth is ranging from deep to moderately deep and from slow to moderately rapid permeability	129 Has.

Table 13. Land Suitability

CLASSIFICATION	AREA
Can be cultivated safely but needs drainage in addition to good management practices to maintain productivity; proper drainage & irrigation system are recommended	260 Has.

b). Land Cover

Table 14. Land Cover

CLASSIFICATION	ITEM	AREA
FORESTLANDS	Total land area of existing natural forests	None
	Total land area of existing brush lands/fallow lands	None
	Total land area of existing plantation forests	None
AGRICULTURAL LANDS	Total land area of existing agricultural lands planted with cash crops	296 has.
	Total land area of existing agricultural lands planted with permanent crops	120 has.
	Total land area of existing agricultural lands planted with mixed crops	150 has.
GRASSLANDS	Total land area of existing grasslands	None
WETLANDS	Total land area of existing wetlands (swamps, etc.)	None
BARREN OR DENUDED LANDS	Total land area of existing barrenlands (no vegetative cover)	None
OTHERS		
TOTAL		6

There is an existing agricultural land planted with cash crops covering an area of 296 hectares, permanent crops with 120 hectares and mixed crops of 150 hectares.

2.4 ECONOMIC PROFILE

2.4.1 Agriculture

1. Agricultural Land Use

Table 15. Agricultural Land Use

Commodity	Area Planted	Potential Area
Corn		
Rice	150 has.	50 has.
Sugarcane	30 has.	10 has.
Coconuts	89 has.	20 has.
Mango	60 has.	15 has.
Others Crops	50 has.	10 has.
TOTAL	379	

Source: DA

An area of 150 hectares or 73.45 % of the total land area is classified for agricultural land use. The major crops grown are Mango, Coconuts, Sugarcane, Banana and Rice. The areas devoted to the production of corn and coconuts are to be maintained, while the existing areas cultivated to lowland palay, sugarcane and export bananas can still be expanded to maximize agricultural land resource utilization. (see table - 15 , above)

A total of 150 hectares is presently devoted to Strategic Agriculture and Fishery Development Zone (SAFDZ).

In order to fully develop the agricultural land resources, the following issues and problems have to be resolved and addressed.

1. Insufficiency of irrigation water to supply the needs of agricultural and other commercial crops.
2. Improvement and maintenance of farm to market roads.
3. Provision of Pre and Post harvest facilities.
4. Lack of marketing network and linkages
5. High cost of farm inputs.
6. Weak cooperative organizations.

Table 16. Strategies Agriculture and Fishery Development Zone (SAFDZ)

	Area (hectares)
NPAAAD	
SAFDZ	150
a) Strategic Crops Sub-Devt Zone	10
b) Strategic Livestock Sub-Devt Zone	
TOTAL	160

Source : DA

2. Sustainability of Agricultural Land Use

2.1. Current farmers situation:

- 2.1.1. Massive use of inorganic fertilizer and chemical
- 2.1.2. More on monocropping
- 2.1.3 Farmers technology is commonly practiced
- 2.1.4 Farmers majority using inbred rice and Corn seed
- 2.1.5 Intensify the adoption of cross breed animal.

2.2 Proposed Strategies to sustain land use

- 2.2.1 Use of Balance Fertilizer (organic fertilizer)
- 2.2.2. Adoption of Multi-inorganic farming system.

3. Production by Type of Crops

Table 17. Major Crops, Area Planted and Production

Crop	Area Planted (Ha.)	Effective Area	Area Harvested (Ha.)	Annual Production (MT)	Average Yield/Ha (MT)
Corn					
Rice	150 has.	6 has.	150 has.	Twice a year	100 bag/hect.
HVCC					
Coconut	89 has.	None	89 has.	quarterly	
Mango	60 has.	10 has.	60 has.		
Sugarcane	30 has.	None	30 has.	Once a yr.	
others	50 has.				

Source: AT

Technology used in each crop

1. CORN - planted as mono-crops, use of traditional varieties.

Issues and Problems:

- Low Production and Low income due to mono-cropping farming technology.

Proposed Strategies to address the situation:

- Adopting a corn-based inter-cropping system.
- Use of organic fertilizer through integrated Nutrient Management Technology.

2. HVCC - Coconut, Banana, Sugarcane (Existing HVCC in the Brgy.)

- Common Technology - mixed cropping

Issues and Problem:

- Low production due to mixed cropping farming practice wherein the crops , compete against soil nutrient, water and sunlight.

- Proposed:

- Practice Sustainable Agriculture Farming using organic fertilizer to optimize production
- Multi Storey and Integrated Farming system.

3. RICE - planting only (2) times/year and w/o crops planted during fallow period (March-May).

- Practicing calendar chemical spraying & heavy usage of inorganic fertilizer.

Issues and Problems:

- Low income due to the present cropping pattern.
- High cost of products

Proposed Strategies to address the situation:

- Utilizing the fallow period (March-May) by planting a short duration crops.

4. Cropping Pattern and Labor Requirements

4.1 Cropping Pattern (Rice and Corn)

In our cropping pattern we have rice, corn, sugarcane. Base in our BNS survey in the month of June, July most of our farmers in the brgy. Starts to plant rice this month, and Sept. and Oct. is the harvesting month. After that December is the second cropping, the farmers start to plant again.

Most of our farmers planted corn in the month of April for the first cropping. And also sugarcane the same.

Average yield is also dependent on the availability of inputs on the right time application which is a consequence of high and increasing cost.

To bring down the cost of inputs, farmers should be trained to advocate and practice the Integrated Pest Management, encourage the use of Organic Fertilizers.

While farmers produce a high average yield, they only earn a negligible net profit.

Table No. 18 Cropping pattern

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep t	Oct	Nov	Dec
Rice												
Corn

Seasonality Diagram: Cropping Pattern (Rice and Corn)
 Source: DA

4.2 Labor Requirements

Labor requirements depend on the production stage/phase. Except for land preparation, planting and harvesting, where additional manpower outside the family is needed, maintenance is done by members of the household. Services of hand tractor operator is hired for plowing, harrowing and leveling. Planting is done by ten (10) people per hectare, usually by "pakyaw" basis. Harvesting requires about ten (10) to twenty (20) persons and on a sharing basis. A thresher is usually manned with a minimum of eight (8) to a maximum of twelve (12) crew members. The thresher operator usually gets one (1) bag per twelve (12) bags threshed.

Maintenance activities such as watering, cleaning of ditches, fertilizer broadcasting and spraying are usually done by members of the household.

The seasonal labor requirements generate temporary work and income to the available from laborers. But on the other side of the landowner the labor cost is increasing annually as with the other agricultural inputs.

Table No. 19 Seasonality Diagram: Labor Requirement

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sept	Oct	Nov	Dec
High												
Minimal												
Low												

Source: Barangay

4.3 Occurrence of Pests and Diseases

Common pests attacking the palay and corn crops are ; borers, snails, flyleaf, worm maggots and harmful insects(blackbug , “piangaw”) and others that cause tungro and other infestations. An agricultural technician is assigned in the barangay to assist the farmers.

2. Livestock and Poultry

Table 20. Household Raising Livestock by Purok

Livestock	P1	P2	P3	P4	P5	P6	P7	TOTAL
Cattle	8	10	9	22	20	10	12	91
Carabao	1	2	10		5	5	3	26
Goat	13	15	5	18	20	22	20	113

Chicken	10	15	11	13	16	19	12	96
Meat				1				1
Laying								

Source: Barangay Survey

Livestock and poultry raising is more of a backyard type and usually for domestic consumption purposes. The poultry and livestock are disposed of during emergency cases usually for medical and educational needs of the family members. Poultry and livestock are also raised and domesticated for butchering during celebration of patronal fiestas and family events such as weddings, birthdays, school graduations and deaths, including anniversaries which are annually observed by the residents.

Like other agricultural products the bulk of animal and poultry products are sold to agents (buyers) coming from outside of the barangay and municipality.

Issues and Concerns:

- Production level is minimal due to high cost of commercial feeds. Feeds commonly used in home-made with no formulation analysis in protein content. Housing are built mostly of light materials. However, most chicken have no proper houses to live in only big trees are being utilized.
- Livestock and poultry raising help farmers augment their income thru backyard raising.

- Cows and carabaos are used as draft working for additional income in farming activities.

Problems & Issues:

- High cost of feeds
- High cost of hybrid livestock
- Inadequate livestock technology
- Lack of working animals

3. Fisheries

An area of one (5) hectares have been developed as fishponds along the creek of the barangay owned by private person. Some marginal fishermen also owns small ponds nearby. Annual production is estimated at 1.0 metric tons.

About twenty (20) or thirty (30) percent of the household are dependent on upland fishing. The common species of fish abundant in the area various fries and there is a number of hito.

Table No. 22 Sea/Rivers/Creeks and Distance from Barangay Proper

5. Others								

Source: DA

3.1 Food Supply and Requirement

With an average yield of 100 cavans per hectare and 150 hectares effective planted to rice, it is estimated to yield a gross of 150 tons of raw palay. Deducting the share of harvester, the thresher, irrigation fees, seeds a net₁₂

more than the domestic consumption is at the disposal of farmers either directly to middlemen (SUKI) or stored for milling.

When milled at 60% recovery and only 70% of the total barangay population, are rice eating, there is a huge surplus of supply to meet the consumption demand.

However corn supply cannot supply the corn grits supply of the corn eating population.

Considering the huge surplus in rice supply effective marketing linkage and strategies shall be explored for better and higher selling price. Post harvest facilities shall be provided particularly for drying, warehousing, and milling purposes.

Irrigation facilities shall be improved and upgraded to insure sufficient supply particularly during the dry season.

Areas devoted to corn production shall be expanded for self-sufficiency and support livestock and poultry industry. High-yielding corn varieties shall also be planted.

Table No. 25 Commodity Balance Sheet, 2005

Commodity	Production (MT)	Consumption (MT)	Surplus/Deficit (MT)
Rice	150 tons	100 tons	none
Corn	100 tons	90 tons	none

Source: DA

4. Agricultural Facilities

A number of agricultural facilities and equipment are available in the barangay for the pre and post harvest activities.

For pre-harvest, the available farm tools and equipments are farm tractors, turtle/mudboats, plow, harrow/leveler and sprayer. The post-harvest facilities include thresher, solar dryers, there are no ricemill nor cornmill and warehouses.

The absence of warehouses and rice/corn mills force the farmers to sell their agricultural products in raw form and directly to middlemen or "suki".

Table 26. Inventory of Farm Tools and Equipments by Purok

Facilities	P1	P2	P3	P4	P5	P6	P7	Total
1. Thresher	1	1						2
2. Corn Sheller								
3. Trailer	2	1						3
4. Farm Tractor	2	1						3

11. Cart			1		1			2

12. Others (bolo/hatchet/spade etc.)	32	62	36	57	93	51	35	366
--------------------------------------	----	----	----	----	----	----	----	-----

Source : Barangay Survey

Issues and Concern:

- Lack of some important farm facilities & equipments based on the area planted to agri crops.
- Farmers with equipments due to high cost of maintenance, oil and fuel resulted to a very minimal return on investment.

Analysis :

Inadequate farm tools and equipments in this barangay resulted to non-modernization goal on food sufficiency since farm machineries play a vital role on agricultural production & profitability.

5. Agricultural Extension Services

Production Support

MLGU extends support in agricultural production in terms of technical assistory services in deploying agri-technicians for crops and livestock production . A cooperative development officer-designate is also assign to organize and supervise the development and institutionalization of non-government organizations. Other support services provided are the establishment of demonstration farms, farmer's continuing education via farmers school on the air, upgrading of farms to market roads and construction of various project. Capability building activities and projects were also conducted by various government agencies and non-government organizations.

Table 27. Production Support

- Artificial Breeding Center					
- Technical/Professional	3	/			
- Rodenticides					
- Animal Breeding Center					
Seeds	1 bag/Ha.	/	/	ADB-DAR	

Source : DA

6. Market Development

Almost ninety (90%) percent of agricultural products are sold outside of the barangay thus income are also spent outside of the barangay. Income and production are not circulated within the barangay.

During harvest season, traders and their middlemen from Digos buy the products where these are processed and milled.

With this situation, there is a need to strengthen and revitalized the existing cooperative to conduct the trading and marketing aspect of agricultural products. Functional links with other consumer cooperatives and markets in Digos and Davao City shall be forged. Pricing and packaging are also to be considered in response to the affordability and financial capability of consumers.

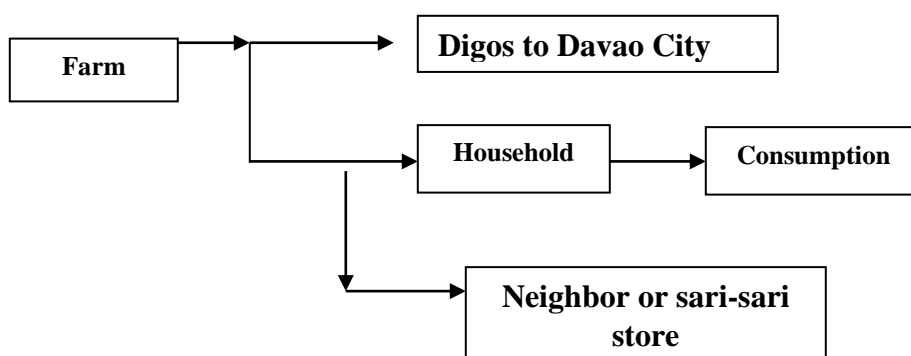

Table No. 28 Market Outlet/Center

Commodity	Outlet/Center (Facility)	Location
Rice	Buying Station /Outside Traders	Within the Brgy.
Corn	-do-	-do-
Coconut	Buying Station	Digos
Mango	Traders	Within the Brgy.

	MLGU	Nat'l Govt.	Private	
1	-	-		
2	-	-		
3	-	-		
4	-	-		
5	-	-		
6	-	-		
7	-	-		
TOTAL				

Source: Barangay Survey

The residents of puroks usually acquire finance in private entities to have their own capital on business, such as sari-sari store, and other activities that can add income to the family.

Problems & Issues:

- High demands for credit in all purok
- High interest from private institutions
- Only limited amount of credit from financiers.

Analysis:

The farmers in all puroks are in dire need of financial assistance from government institution to avail of lower interest rates.

7. Irrigation Development

There is an irrigation facility, a project of the National Irrigation Administration (NIA) which has served as around 2 farmers in the rice producing areas.

Table 30. Irrigation Facilities

Irrigation Facilities	Service Areas (Has.)	Farmers served
NIA Irrigation	5 has.	463

Source: Barangay

8. Other Infrastructure and/or Post-harvest Development

Table No. 30 Other Infrastructure and/or Post-harvest Development

Purok Name	FARM-MARKET ROAD		BRIDGES		OVERFLOW BRIDGES	
	Number	Total Length	Number	Total Length	Number	Total Length
Purok - 1						
Purok - 2						
Purok - 3						
Purok - 4						
Purok - 5						
Purok - 6	1	2 mtrs.				
Purok - 7	1	2mtrs.				
TOTAL						

Source : Barangay

Issues and Problems:

1. Some of the farm-to-market roads are ungraveled especially in Purok 6 and 7. There is bridge and culvert, but due to bad road condition during and after the wet season susceptible to road accidents really necessitates regular maintenance budget allocation.

Analysis:

Flow of agricultural products is sometimes hampered during wet season because of the road condition. Moreover, farmers pay high transport cost.

Table No. 31 Extension Support, Education and Training Service

Kind of Training	No. PAX	No. of IFC Mat. Distributed	How It Helps to the farmers activities
1. Crops 1.1 FFS -Rice 1.2 Mango Culture	60 pax 40 pax	5 2	1. Crops: Reduced Production cost achieved higher profitability.
2. Livestock/Poultry 2.1 Animal Diseases & its control measure	50 pax	3	Less infestation of animal diseases & thereby helps in attaining higher income.

Source : AT

• Issues and Problems:

- Only few farmers are willing to attend a long period of FFS training (20 weeks at 1 day/wk).
- Lack of financial support in conducting training.
- Trained farmers are only good in the application of the introduced technology, but after few months from graduation they go back to their usual way of old farming technique due to lack of farm capital.

- Analysis:

Education and training attended by farmers in this barangay is not a full guarantee in achieving higher production and profitability because the priority consideration in the farm is the capital to be used in the implementation of the introduced technology . Technology therefore shall be backed up with production credit support.

Table No. 32 Extension Services

Extension Worker	Agency		Frequency of Visit
	Government	Private	
1. Agricultural Technician (crops)	1		Weekly
2. Veterinarian/Livestock Technician	1		Monthly

Source: MAO

- Techno Demo Established & Technology Demonstrated

1. Organic based balance Fertilization on Rice Production
2. Demonstrated the gradual use of Organic fertilizer in combination of in-organic fertilizers.
3. Demonstrated the introduced integrated pest management technology and compared to their usual farmers practice, which is calendar spraying.

- Issues and Problems:

- Inadequate planting materials for use as demo.
- Lack of capital to undertake the project.

- Analysis:

Research/Farm Demos are only established in limited areas and the results of these farm demos are not properly adopted by the farmers due to limited farm capital.

9. Regulatory Service

- Barangay Ordinance adopted/implemented were:

- Imposing penalties to stray animals damaging crops
- Illegal fishing in creeks, and other water bodies.

- Penalty

These ordinances are not properly implemented because the concerned Barangay officials are not so vigilant to enforce the laws.

Problem and Issues:

- Lack of political will among barangay officials
- Not all residents are aware of the ordinance and other stubborn individuals remain the violators inspite of the laws.

- Analysis

- Laws and ordinances adopted by the Barangay Council are useless if not properly implemented. Capability building among legislators is highly needed on this particular barangay. By doing so, there is a big possibility that all laws and ordinances shall be implemented.

2.4. 2 Forestry

TOTAL AREA OF PUBLIC LANDS

- % of public lands : 3.00 has. (8.385) (area for public lands/total barangay area) * 100

ALIENABLE AND DISPOSABLE LANDS

- Total area for A & D lands : 516 has.
- % of public lands classified as A & D : _____% (Tot. A&D/Total area of public lands) * 100

Sitios where A&D Lands are located:

Sitios	Total Area for A&D Lands per sitio
Brgy. Kibuaya	All lands are classified as A&D

Solid Waste Management

The solid waste system in the barangay is still an individual household concern, with wastes dump in backyard compost pit. Waste segregation is not implemented although awareness and barangay orientation activities conducted and barangay solid management committee was organized.

2.4. 3 Agrarian Reform

a) Carpable Lands

- Total CARPABLE AREA : None
- Total land area distributed under CARP : 36 has.
- % of land area distributed / total CARPABLE area: 6.98 %
- Sitios Located : P-3 Fatima, Sunga
- Total no. of CARP beneficiaries : 36 Persons

2.4 .4 Commerce, Trade and Industry

Most of the business establishment in Barangay Kibuaya are operating on small-scale and household type. About Eighteen (18) sari-sari stores are present. Most of the residents do their marketing in Poblacion because of a very accessible in transportation.

a) Table No. 33 BUSINESS ESTABLISHMENTS IN THE BARANGAY

ESTABLISHMENT TYPE (ex. Sari-sari store, services etc.)	Sitios where these establishments are predominantly located	No. of Establishments (per type)	Average Number of Employed Person (according to establishment type)	TOTAL NO. OF EMPLOYED PERSON ACC. TO ESTABLISHMENT TYPE
Sari-sari Stores	Barangay site	18	1	1
Total Employment size generated by commercial establishments				

2.4.5 Tourism and Recreational Facilities

2.4. 5.1 Tourism Sites and Potential

“FESTIVALS AND FESTIVITIES”

- Barangay Fiesta
- Araw ng Barangay (Conduct cockfighting)
- Araw ng Puroks

2.5 SOCIAL SERVICES PROFILE

2.5.1 Health and Nutrition

2.5.1.1 Health, Nutrition and Family Planning and Sanitation

Among the diseases that the recurring and occurs during the rainy season are diarrhea and cough in not alarming levels. A botica sa barangay was established and is functional. A Barangay Health Station was also established manned by registered midwife and assisted by Barangay Health Workers, and Barangay Nutrition Scholars.

2.5.1.2 Medical Health Facility/ Personnel and Services

There is a Barangay Health Station in the barangay where services of a rural midwife is available during working days of the week. The midwife is also responsible for the conduct of various health-related activities such vaccination and other preventive measures. Patients that needed medical attention are referred to the main health center in Poblacion about Ten (10) kilometers away to the Integrated Provincial Hospital in Digos City.

Table No. 35 Distance to Medical Health Facilities

From Barangay	To			
	Brgy. Health Center	Mun. Health Center	Secondary Hosp. in Digos	Teriary Hosp. Davao City
Kibuaya	1	1	4	10

Source: MPDO

The barangay has one (1) health center within the Barangay Hall. The center serves as the place for consultation of pregnant women, immunization of children and other health benefit programs of the Municipal Health Office. One (1) midwife, who receives salary from the municipal government is assigned in the barangay. There are five (5) barangay health workers and one (1) Barangay Nutrition Scholar (BNS) rendering health care services and they received honorarium from both barangay and municipal government.

Table No. 36 Number of Health Personnel

Personnel	No.	Benefits/ Honoraria Given		
		By BLGU	By MLGU	By PLGU
Midwife	1			
Brgy. Health Worker	5	540.00/mo		
Brgy. Nut. Scholar	1	890.00/mo.		
Hilots	1

2.5.1.3 Leading Causes of Morbidity

The leading cause of morbidity in the barangay are diarrhea and cough. These diseases are recurring and occur during rainy season.

Table No. 37. Leading Causes of Morbidity (0-5 years old)

Causes	Number of Cases			Total	Rate
	Male	Female			

Parasitism				
Dog Bite	1	1	2	
TOTAL				

Source: BHWs

The morbidity report covers only those who have consulted at the barangay health station and main health center. This does not include consultations and medications done at the private hospital and clinics. The leading cause of morbidity is parasitism among children which is attributed to lack of care by parents and improper handling of food. This can be addressed through deworming which is done twice a year by personnel of MHO or midwife assigned to that certain barangay usually in the months of May and October.

2.5.1.4 Leading Causes of Mortality

Pneumonia is the leading cause of mortality in the barangay.

Table No. 38 Leading Causes of Mortality (0-5 Years old)

Causes	Number of Cases		Total	Rate
	Male	Female		
- Pneumonia	0	0	0	
TOTAL				

Source: BHWs

There are no reported cases of mortality in pneumonia among children. Pneumonia is a deadly disease that needs sufficient amount of money to treat the disease. Acute disease of this kind is usually treated in secondary hospitals in order to survive.

2.5.1.5 Leading Causes of Maternal Mortality

Table No. 39 Leading causes of Mortality (at least 3 years back)

Year	Causes	Number of Cases
2007	Pre-mature	1

Source: MHO

There is only 1 recorded maternal mortality that happened in the barangay for the last 3 years. This is due to lack of information on the regular pre-natal care services which is pursued by the rural health midwife and the BHW to avoid such incident.

2.5.1.6 Nutritional Status

Table No. 40 Nutrition Status by Gender (0-5 years old)

Gender	Population	Normal		Below Normal Low		Below Normal Very Low	
		Magnitude	%	Magnitude	%	Magnitude	%
Male	120	112	93%	7	5%	1	80%

Female	121	116	95%	3	20%	2	1.6%
TOTAL	241	228	94%	10	4%	3	1.2%

Source: BNS Record

There are 241 children aged 0-5 years old weighed by the Barangay Nutrition Scholars. Of these, 239 have normal weight, 2 are below normal (BN) and zero on below normal low (BNVL). The barangay government recommended for the giving of supplemental feeding and promote backyard gardening to maintain the good nutrition among children.

Table No. 41 Data on Birth Registration (2009)

Number of Births			Registered		
Male	Female	Total	Male	Female	Total
24	27	51	24	27	51

The barangay has a total of 51 births in year 2009 and among those are all registered in Mun. Civil Registrar as per survey with the barangay secretary.

2.5.1.7 Birth Control and Methods Used

Table No. 42 Couples Engaged in Family Planning by Purok

Purok	Total No. of Couples	No. of Couples Engaged in Family Planning

b) **Table No. 66 MODE OF TRANSPORTATION**

TYPE OF VEHICLE (ex. Truck, motorcycles, etc)	UTILITY TYPE (ex. Public, private)	TOTAL NO.
Tricycle	Public	30
Motorcycle	Private/Public	20
Truck	Private	2

Source : MPDO

For transportation, the table above shows that more households own motorcycles because it can easily be acquired through easy monthly installment plans offered by companies elsewhere. Motorcycles are good type of transportation in the barangay because it can penetrate remote areas that cannot be reached by four-wheel cars. Some households derive their means of living by employing single motorcycles as public utility transportation known in the local parlance as "single motorcycle".

4. COMMUNICATION

Commonly used in the barangay nowadays in communication is mobile phone. Mobile phones are becoming more popular with the presence of SMART and GLOBE cellular sites. They are also using Hand set radio to communicate between the barangay officials and the municipal government and other line agencies.

Table No. 67 TELECOMMUNICATION Services

TELECOMMUNICATION FACILITIES AVAILABLE IN THE BARANGAY	LOCATION OF THESE FACILITIES	MODE OF OWNERSHIP	NO. OF HH SERVED
Handheld radio	Brgy hall and Military Detachment	Public	
Mobile Cellphones	Barangay Site	Private	

Source: Barangay

Table No. 68 BROADCAST MEDIA SERVICES

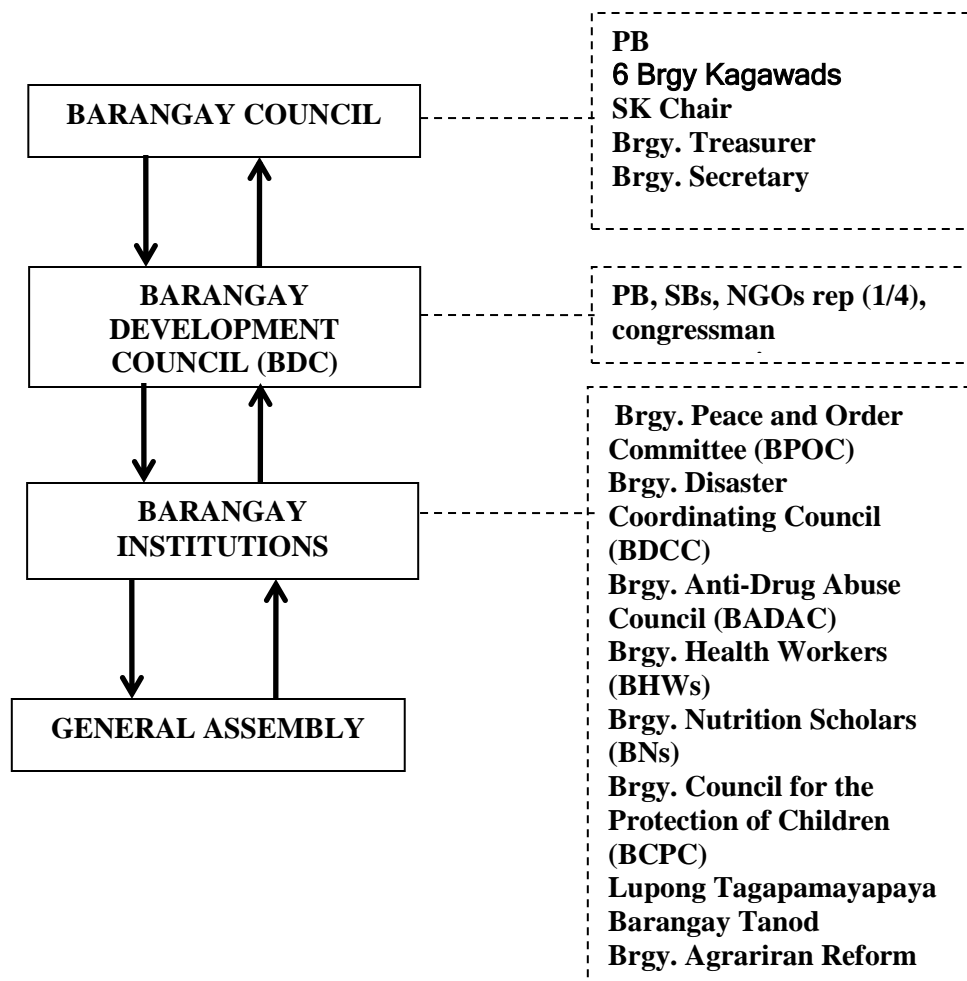

TYPES OF BROADCAST MEDIA FACILITIES THAT HAVE REACHED THE BARANGAY	NO. OF HH SERVED
Radio	259
Television	192

Source : Barangay Survey

Radio and television are broadcast media facilities that have reached the barangay. However, not all households own television. For those who cannot afford to buy television due to poverty, they just have the radio to keep them informed as well as it is a source of recreation and relaxation to them by listening music and drama.

2.7 Barangay Local Government Profile

1.1 Development Administration

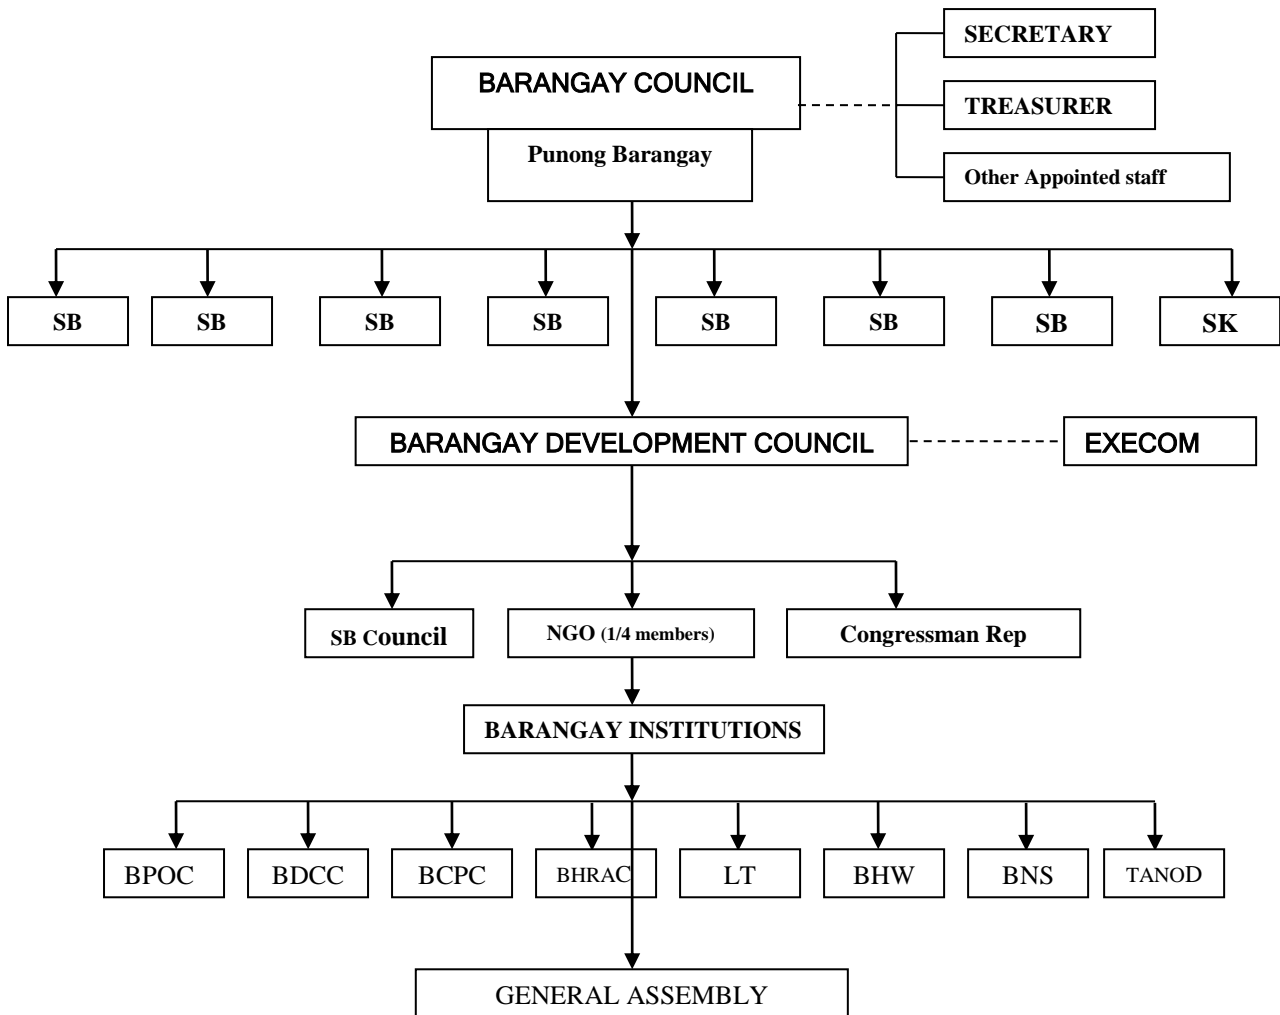

BARANGAY COUNCIL

The barangay being the basic political unit, serves as the primary planning and implementing unit of government policies, plans, programs and activities in the community, and as a venue wherein the collective view of the people may be expressed and considered, and where disputes may be amicably settled.

The organizational structure of the Barangay Government of Kibuaya places the Punong Barangay at the helm of local government leadership. Under the punong barangay are the members of Sangguniang Barangay and SK Chairman who serve as the local legislative body. Under the supervision of the punong barangay are the barangay secretary, treasurer and utility worker.

Organization Rating Matrix of Barangay Officials

DUTIES AND FUNCTIONS OF THE BARANGAY AND APPOINTED OFFICIALS

- Punong Barangay** - General supervision, control and implementation of programs and activities; act as the presiding officer during of the session of the barangay council.

- Sangguniang Barangay** - Legislative function and related services.

- Treasurer** - Collection and disbursement of funds and custodian of barangay properties.

- Secretary** - Secretariat to the barangay council and keeper of records of the barangay.

Source: Barangay

Barangay Development Council

Section 106 of RA 7160 provides that each barangay shall have multi-sector development plan to be initiated by the barangay council for the purpose of setting direction of economic and social development and coordinating development efforts within its territorial jurisdiction.

Administration of Justice

To carry out the barangay justice system, the Lupon Tagapamayapa was organized in the barangay which is composed of the Punong Barangay as Chairman and 15 members.

The lupon exercises administrative supervision over the conciliation of parties in dispute. Lupon meets regularly to provide forum to have an exchange of ideas among the members and the public in matters relevant to amicable settlement of the disputes. There are 15 cases indorsed to lupon and 85% were settled amicably.

Public Order and Safety

There are 20 barangay tanod in Barangay Kibuaya , all receiving honorarium from the barangay. Its duty and responsibility is to safeguard and protect the life and properties of the barangay people.

CVO members had attended skills training conducted by the provincial government in coordination with the DILG and PNP has to learn new strategies of crime prevention and awareness in anti-emergency efforts of the government.

Performance of the Barangay Officials

The barangay has a satisfactory rating in almost all items in administration of basic services to the different sectors. However, it got low rating in the performance of the barangay development council particularly during conduct of regular meetings for they meet only as the need arises. Likewise, they got low rating in the conduct of participatory monitoring and evaluation because the system is not yet institutionalized in the barangay. The barangay officials got outstanding rating in the conduct of general assembly, hearing and investigation and in the making and submission of reports.

CHAPTER 3 - SITUATION ANALYSIS

It analyzes the situation of the barangay and identify the land issues and conflicts, the sectoral needs, issues and concerns to be addressed, opportunities and potentials that can be tapped, causes & effects of the core problems, the poverty situation and provided revenue generation and allocation.

3.1 LAND USE ANALYSIS

- Existing Land Use

The total land area of Barangay Kibuaya which is 516 , the existing land use classification of the barangay shows that a large part is for agriculture covering an area of 150 hectares. This indicates of 29.07% is used for agricultural production.

Land Uses	Area (Hectares)	Percentage to Total Area
1. Agriculture	150 has.	29.07%

2. Built-up		
3. Roads	17.12 has.	3.32%
4. River		
TOTAL		

- **Road Network**

The present land area covering the road network of the barangay stands at 17.12 has. Or 3.32% of the total land area. However, the poor road condition hinders the smooth and fast delivery of farm products to the market. As a result, the economic growth of the locality is hampered due to this fact. Some barangay roads are impassable during rainy season, thus, rehabilitation, repair and maintenance is needed to provide access roads to the market (Figure 1 Road Network Road Map)

Name of Road	Total Length (km)
1. Sta. Cruz Rd.	3.000
2. Sto. Niño Rd.	2.500
3. Upper Brgy. Rd.	2.000
4. Lower Brgy. Rd.	2.000
5. Fatima Brgy. Rd.	2.000
6. San Miguel Rd.	2.000
7. Sta. Cruz Rd.	0.815
8. Sto. Niño	2.800
TOTAL	17.12 kms.

Problems & Issues:

- Roads are flooded during rainy season
- Some part of barangay roads are impassable during wet season
- Roads are ungraveled
- Inadequate farm-to-market roads.
- Water Bodies

The water bodies particularly the creek in the barangay occupy an area of 5 has. Or 0.97 % of the total land area. There is only one (1) creek that traverse the barangay. (Figure 2 Water Bodies Map).

Types of water bodies	Names
1. Creek	San Miguel - Purok 2

- **Problems / Issues:**
- River scouring of bank if cannot regulate & control flood.
- Occurrence of flash floods
- Damage to crops
- Infrastructure and Settlement

The infrastructure and settlement or the built-up area comprises of ___ has. Or _____% of the total land area. There are structures like houses, purok centers, chapels, school building, solar drier which are constructed within this area (Figure 3 Infrastructure/Settlements Map).

Problems/Issues

- Lack of potable water
- There are households living in makeshifts houses
- All public buildings needs to be rehabilitate.
- Lack of access roads to remote areas.

- Land Cover

Cash crops occupy the large area of agricultural land with 296 hectares out of 516 has. Then followed by the mixed crops which uses 150 hectares and permanent crops with 120 has. Which includes all types of crops that the constituents wanted to plant in a certain area. The high cost of farm inputs such as fertilizers and pesticides which the farmers could hardly afford to buy and resulted to low production makes the farmers still living below poverty line of lifestyle. In addition to that the poor road conditions especially during rainy season has caused also financial hardship to farmers to transport their farm production to the market. Marketing linkages and credit facilities with minimal interest or free-interest are also needed to alleviate the living condition of the farmers. (Figure 4 Land Cover/Vegetation Map).

Types of Land Cover

Types of Land Cover	Area (Hectares)
1. Cash Crops	296
2. Permanent Crops	120
3. Mixed crops	150
4. Wetland	
5. Others	
TOTAL	566 has.

Problems/Issues:

- Lack of training on proper farming methods
- High cost of farm inputs
- Difficulty of bringing the farm products to the market due to poor condition of the road.

- **Protection/Riparian Zone**

Occurred flash flood should be controlled to protect the scouring of river and to maintain the depth of the river to avoid deflection from the course of the flow towards the banks which could damaged the adjoining farmlands. (Figure 5 Protection Map).

- **Erosion/Flood Hazard**

During heavy rainy season the road was muddy . Roads becoming muddy and not passable for travelers were mitigated by planting trees along the roads and periodic crowning by motorgrader funded by Barangay Dev't. Fund and Barangay Road Maintenance Project.

Joint Barangay Ordinances were enacted to implement Riverbank Protection Program through Bamboo or Tree Planting.

- **Land Use Conflict**

Households are present erected not on their owned-lot or as squatters but there are no recorded cases of disputes due to amicable settlements with the land owners.

In the territorial jurisdiction of the barangay, this is still referred with the Municipal Assessor in order to regulate the tax assessment and in the proper disposition of the tax revenues. Adjacent barangays are Sacub, and Lanuro.

ROAD NETWORK

Types of Road	Length (kms.)	Specific Names	Specific description (concrete, asphalts, graveled, unpaved)	Recent Physical Condition	Importance of the Road	Problems/Issues	Possible effects of the Problem	Suggestions/Recommendation
Brgy. Road	3.000	1. Sta. Cruz Rd.	Graveled Rd.	Passable but some portions need graveling	Necessary for transportation	Passable but muddy during rainy season	The road condition may be damaged	Needs maintenance for graveling of the road
Brgy. Road	2.500	2. Sto. Niño Rd.	Graveled Rd.	Passable during dry season but muddy on wet season	The road is necessary in transporting products	Passable but very muddy during rainy season	Damages and worsens road condition	Needs Grader for graveling of the road
Brgy. Road	2.000	3. Upper Brgy. Rd.	Graveled Rd.	Passable Road	Necessary for transportation	Passable but dilapidated	Road condition maybe damaged	Needs repair and maintenance
Brgy. Road	2.000	4. Lower Brgy. Rd.	Graveled Rd.	Passable when the road is dry	Transport of products from remote area	Passable during dry season	Worsens road condition	Needs repair & maintenance
Brgy. Road	2.000	5. Fatima Brgy. Rd.	Graveled Rd.	Passable Road	Necessary for transportation	Passable but dilapidated	Road condition maybe damaged	Needs repair and maintenance
Brgy. Road	2.000	6. San Miguel Rd.	Graveled Rd.	Passable when the road is dry	Transport of products from remote area	Passable during dry season	Worsens road condition	Needs repair & maintenance
Brgy. Road	0.815	7. Sta. Cruz Rd.	Graveled Rd.	Passable but some portions need graveling	Necessary for transportation	Passable but muddy during rainy season	The road condition may be damaged	Needs maintenance for graveling of the road
Brgy. Road	2.800	8. Sto. Niño	Graveled Rd.	Passable Road	Necessary for transportation	Passable but dilapidated	Road condition maybe damaged	Needs repair and maintenance

WATER BODIES

Types of Water Bodies	Distance or Width	Specific Names (Ngalan)	Importance of water resources to households	Physical Condition	Problems/Issues affecting water bodies	Possible effects of the Problem on Water bodies	Suggestions/Recommendation
Creek & NIA Irrigation	10 kilometers	Kibuaya Creek	Linkage Part Sacub to Part Kibuaya , Hagonoy, Dvo. Del Sur.	Permanent supply of water during dry season	River scouring of bank if cannot regulate & control due to flash flood	Occurrence of flash floods; damage to crops.	<ul style="list-style-type: none"> - Regulate and control of flash flood during rainy season. - To have proper drainage canal for water disposal.

INFRASTRUCTURE/SETTLEMENTS

Types of Infra	Names/Types	Specific Description (Qty. Size)	Present Physical Condition	Importance	Problems/Issues	Possible effects of the Problem	Suggestions/Recommendation
Barangay Hall	Ordinary Type w/session hall	15mts. X 15mts.	Good	Sessions, meetings & transactions	Some parts of the building are not yet finished	Damages the building	Needs maintenance and repair
Health & Day Care Center	Ordinary Type Ordinary Type	15 x 15 mts. 15 x 15 mts.	Good	Health, nutrition & kinder/nursery classes	Some parts need for rehabilitation	Could not be used soon	Needs maintenance
Purok Center	All Purok	8 x 8 ft.	Currently used but some are dilapidated	Purok meetings	No funds for repair & maintenance	Could be in state of disrepair or destruction	Request funding though the barangay council or solicit amount for regular repair and maintenance
Settlements	Settlements		- Concrete - Wooden - Makeshift - Semi-concrete	For Shelter	Made of light materials under repair	Could soon be homeless	Needs improvement & repair
School Building	Apolonio Fuentes, Sr./ Elem. School		Good	Source of basic education	Classrooms must be repaired	Could not be used soon	Needs periodic repair
Electricity	DASURECO	-	Good	- Save more time & money - Improve the standard of living	All are energized but others can't afford to connect electricity.	Still uses kerosene Gas for lighting	Expansion to all puroks
Creek	San Miguel Purok 2	5 kms.	Good	- Passable to all constituents	Scouring of structure	Could not be used soon	Operation & Maintenance buget annually to follow the MOA for ten yrs.
Learning research center	Ordinary Type		- Concrete - Wooden	Source basic education	Lack of learning materials	Childrens lack of knowlege	Needs Improvement
Tanod Outpost	Ordinary Type		-Wooden Semi-concrete	For security of our constituents	Some parts of building not yet finished	Not yet finished	Needs Improvement
Electric Pump			-Safety drinking water	Improve the standard of living	Electric damage	Could not be soon	Needs Maintenance & Repair

LAND COVER/VEGETATION

Existing Land Cover	Estimated Land Area (In Has.)	Physical Condition	Problems/Issues	Possible effects of the Problem	Suggestions/Recommendation
Total Land Are					
Cash Crop	120 Has.	Planted with rice, corn, coconut, monggos and vegetable	Some crops do not yields good harvest due to infestation of disease and insufficient water supply from the river	Low income resulting in non-payment of credit to financiers	Refer to technician for proper training and recommended technology to be used
Permanent Crops	180 Has.	Others grow favorably but some crops need care and maintenance	Difficulty in carrying products to the main road/market	Double hauling of products in some remote areas	Repair/rehabilitate impassable roads
Mixed Crops	200 Has.	Planted with mixed crops	Some crops could not survive due to climate change	Low Income	Right training and technology

PROTECTION

Existing Land Cover	Legal Basis (Name of law ordinance)	Specific Location (Sitios Purok)	Estimated land Area (In Has.)	Present Land Use	Problems/Issues	Possible effects of the Problem	Suggestions/Recommendation
Riparian Zone	Refer to Municipal Assessor	Purok 2	5 kms.	There are households settling along creek	Landslide, soil erosion and flood occur in the creek	Soil Scouring of creek if can't regulate & control the flash flood	Regulate & control of flash flood to have proper drainage canal for water disposal.

EROSION/FLOOD HAZARD

Type of erosion	Estimated Land area (Has.)	Location (Sitios Purok)	Specific Manifestation of soil erosion	Effects of soil erosion in the area	Possible effects of the Problem	Suggestions/Recommendation
Slight flood	5 kms.	Purok 2	During heavy rainy season the erosion & floody areas were observed.	Crops, livestock & properties are damaged	Muddy roads & crops are destroyed	Massive tree planting along the roads and periodic crowning by motorgrader.

LAND USE CONFLICT

Existing Land Cover	Estimated Land Area (Has)	Location (Purok)	Present Physical Condition	Problems Encountered, Issues & Concerns	Possible Effect of the Problem	Suggestions/Recommendations
Planted with Cash Crops, mangoes, corn & vegetables	200 has.	Purok 2, 1, 6, & 7	Suitable for agricultural crops	Households are lot leasing.	Identity of households occupying conflict areas particularly during registration and land ownership and other similar problems to be encountered in the future.	To avoid confusion as to when the area being utilize by the landowner the occupants precaution not to build houses made of strong materials.
Settlements Area along Kibuaya Creek	5 kms.	Purok 2	Increasing number of households building temporary shelters along the creek	There are houses along the creeks	Dangerous to transport vehicles passing the purok 5, 6 & 7 during rainy season.	Find relocation areas to stubborn households living along the creek and NIA canal.

**ANALYSIS BY SECTOR
SUMMARY ON SITUATIONAL ANALYSIS**

Sector	Development Potentials	Problems and Issues	Constraints	Opportunities
Economic	<p>Agriculture</p> <p>a. Strategic crop dev't. zone</p> <p>1. Production of rice, corn, sugarcane, coconut and vegetable</p> <p>2. Vermicomposting</p> <p>b. Strategic Livestock Development Zone</p> <p>1. Production of large & small animals & upgrade animals</p> <p>c. Credit & Marketing Dev't. Zone</p> <p>1. Strengthen Kibuaya Cooperative and continuous capital build-up</p> <p>d. Environmental Management</p>	<p>-Poor farming technology and use of inorganic fertilizers</p> <p>- Poor on family planning</p> <p>-Low population of livestock in a vast pastural lands</p> <p>-Lack of medical facilities</p> <p>-Floods along the creeks & drainage canal</p>	<p>Increase production and food security with low input</p> <p>Increase animal production</p> <p>Assistance to Brgy. Public Market</p> <p>Trees protects the environment, prevent floods</p>	<p>Avail of technical supervision from DA</p> <p>Avail of animal dispersal from the government</p> <p>Promote development of cooperatives</p> <p>Prevention of flood</p>
Social	- Water Facilities	Lack of distribution of jetmatic ; Lack of Health facilities	Households are provided water facilities	Avail of government financing for water utilities program
Infrastructure	<p>1. Concreting, rehabilitation & maintenance of Farm-to-Market roads</p> <p>2. Electricity</p> <p>3. Government Facilities</p>	<p>Impassable during rainy season due to dilapidated road condition and floodings.</p> <p>No distribution lines to remote sitios</p> <p>Lack of mini-gym, mobile emergency vehicle</p>	<p>Fast and easy to transport of farm products and in human loads</p> <p>Households are provided for health assistance</p> <p>Sports & meeting facilities are provided, stand-by vehicle for emergency calls</p>	<p>Avail of government loans and other infrastructure projects</p> <p>Expansion program of DASURECO</p> <p>Gym and ambulance are most common programs of local political leaders</p>
Local Governance	Barangay Revenues	Poor collection of taxes	Increase Income	Honorarium/Additional benefits for barangay council members and leaders
Land Use and Environment	Undeveloped forested area of 5 hectares.	Lack of access roads, uncultivated lands	Lands are developed and its utilization are maximized	Avail of government financing for health center

The Situational Analysis Matrix

Development Parameters	Issues that Matter	Existing Condition	Trends	Problems/Causes	Implications	Strategic Interventions
Environment	Creek	Protected area and Riparian	Gradual landslides	Erosion, Floods during heavy rains - Poor farming income due to lack of financing	Destruction of crops and properties	Households conduct tree-planting along the creek construction of dikes.
Water	All Purok	Remote areas without potable water	Needs water from the source	Lack of extension pipes from the source	No potable water	Municipal Government to provide jetmatic pipes for the constituents.
Literacy	All Purok	Some children are not sent to school	Lack of skills and knowledge resulting to low income of households	Illiteracy Problem	Not enough income because of lack of knowledge, techniques	Attend livelihood seminars/trainings conducted by the government or engage in poultry livestock project to augment income.

CHAPTER 4 - DEVELOPMENT PLAN

DEVELOPMENT FRAMEWORK

VISION:

A highly-developed barangay having sustainable resources, with healthy, responsible and God-fearing citizenry living in a peaceful, orderly and ecologically-balanced society.

MISSION:

It is a commitment of the barangay government to provide adequate infrastructure, enhance agricultural production through modern technology so as to provide progressive, peaceful, and reputable community with active participation, coordination and cooperation of all stakeholders in the community.

GOAL :

To become effective and efficient in our efforts to provide the needed infrastructure and agricultural support services in close partnership with all the stakeholders.

BARANGAY POVERTY REDUCTION AGENDA (TARGETS)

Core Poverty Indicators	Baseline Data	Poverty Reduction Targets
Lack of Income	Means of living of households provides only meager income	Engage in livelihood projects with non-financial resources
Many are unemployed	The income not enough to cover up the basic daily needs.	Find ways to look for a job anywhere just to augment income
No land of his own, only laborer	No other livelihood skills except as laborer	Encourage households to attend livelihood project seminars undertaken in the barangay to gain knowledge
Unable to send children to school	Means of living of households provided only meager income	Encourage households to enroll their children to government institution or avail of scholarship program
Lack of Potable Water	Lack of budget allocated intended for water facilities due to low income of the bgry.	Request assistance from Mun. Government to allocate pipes for the installation of jetmatic in the remote area of the barangay.
Households living along the Creek & NIA Canals	Only squatters of land, no house and lot to dwell	Find relocation/resettlement areas
Lack of Knowledge	Many youths are unschooled	Encourage the youth to enroll in non-formal education or attend livelihood trainings/seminars
Lack of farming techniques	Many farmers are still using the old system of farming method due to lack of training and capital	Provide demonstration farm and right farming technologies
Lack of program for farmers	Implementation of government plans and programs to households is greatly affected because of lack of it.	Request assistance for the construction of the necessary government facilities
Lack of Facilities	Needed additional facilities for the increasing number of population	Appropriate amount for construction of facilities from barangay funds or from other sources.
Lack of monitoring and evaluation	No auditing conducted from previous projects up to the present	Require regular inventory of all properties and inspect all implemented projects of the barangay
Cannot express oneself	Typical problem common in the barangay	Raise their level of awareness and motivation
Gambling	No stable jobs	Engage in poultry/livestock raising and other income-generating projects with lesser capitalization
Unable to pay debt	No stable jobs	Find job opportunities elsewhere

REVENUE GENERATION AND MANAGEMENT ENHANCEMENT PLAN

Objectives	Impact Indicators (including amount of revenues to be generated)	Development Interventions (Programs/Project/Activities)	Period of Implementation & Budgetary Requirements					Source of Funds
			2009	2010	2011	2012	2013	
Require CTC to permittees in every transaction in the brgy.	20% increase collection in CTC is expected	Annual Activity of the barangay	Jan.	Jan.	Jan.	Jan.	Jan.	Barangay
Intensify RPT Collection	10% per annum could be generated from delinquencies	Grant tax amnesty to delinquent taxpayers to update payments of Real Property Taxes (RPT)	May	May	May	April	April	Barangay
