

# EXECUTIVE SUMMARY

San Isidro, Hagonoy, Davao del Sur  
CY 2013-2017

## I. VISION

A progressive and competent barangay with sustainable resources, socially responsive, well-oriented and friendly inhabitants, living in a fully developed and peaceful community.

## II. MISSION

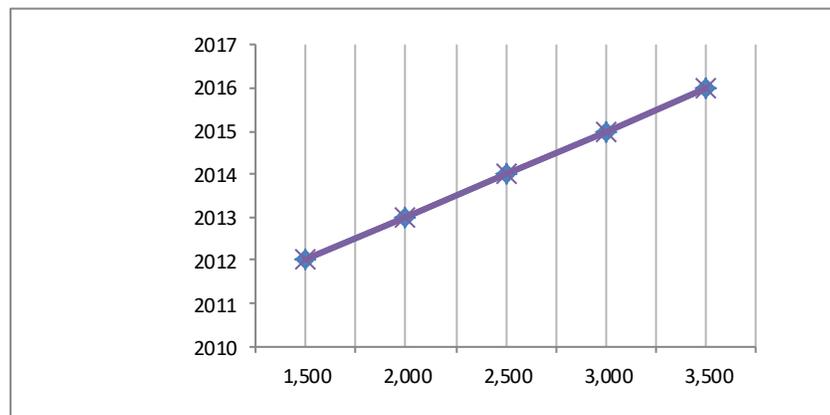

It is the responsibility of the barangay to fully-developed its community into a responsive, well-oriented and friendly inhabitants by promoting opportunities in socio-economic development for the people, promoting the development of its resources through sustainable utilization in order to create peaceful and orderly environment.

## III. BRIEF SITUATIONER

### Demography

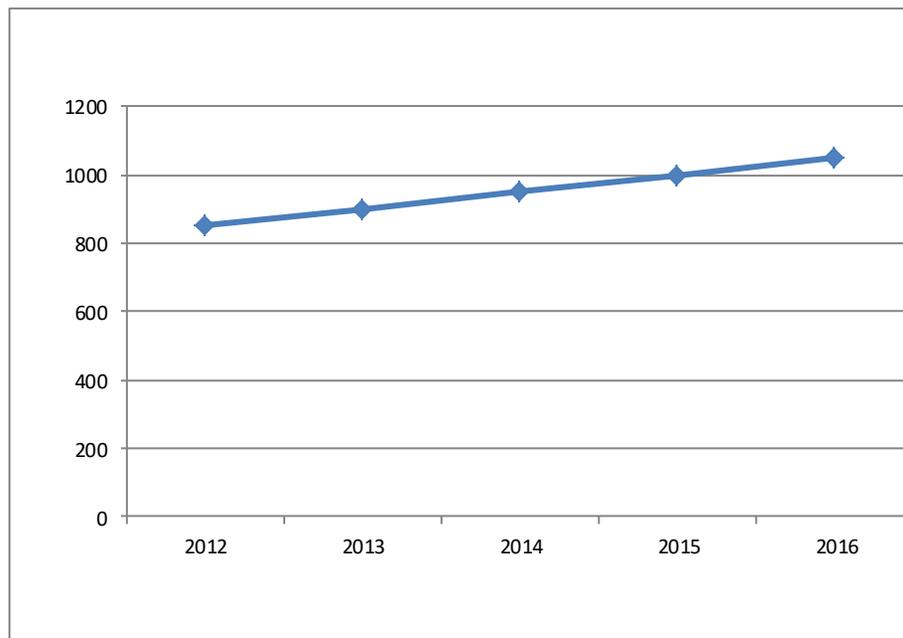

- Population

**Population Growth and Trend**

As of 2013 Barangay Survey, San isidro has a total of One Thousand Seven Hundred Ninety Three (1,793) population. The population growth rate of the Barangay had gradually increased until 2017 it is projected to reach around 2,300 partly contributed to the increase of population are due to lack of massive and intensified campaign on population control program.

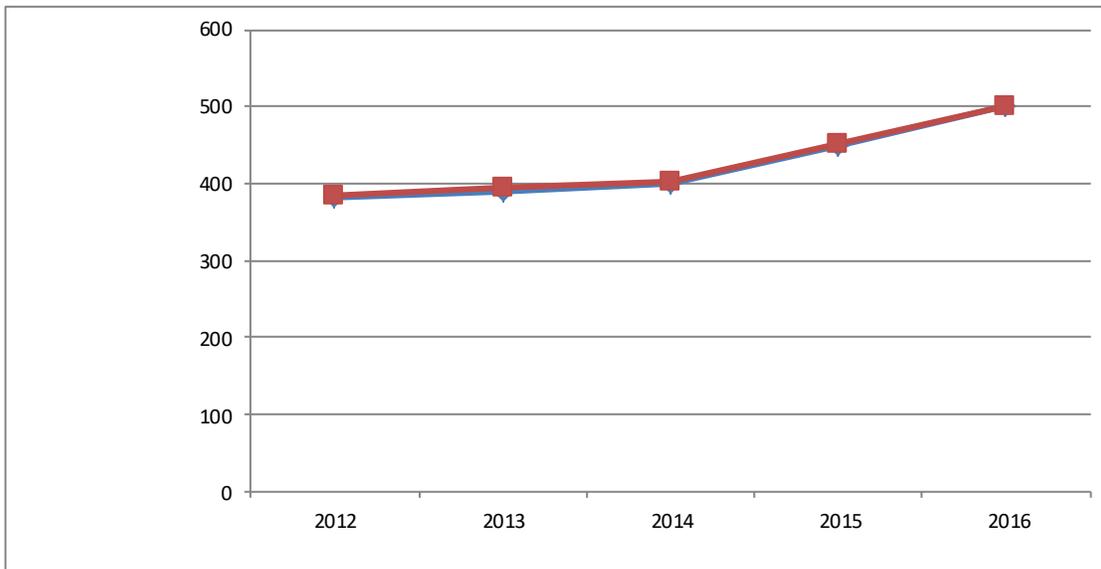

- **Labor Force**

The labor force is projected to increase yearly as shown in the chart above. With the nature and type of economic activities presently available in the Barangay, it would mean tremendous increase in the number of unemployment that in the labor force and while economically active yet unemployed. There is therefore need of more employment opportunities and enabling support services for social and economic stability. From 2013, the labor force tallied 300 persons and 2017 up to 400 persons.

- **Social Services**

- **Education**

There were 351 school age population were enrolled in elementary, high school and college education. The Barangay projected that the enrollees for the next year will increase. We have one (1) complete elementary school with a ratio of 32:1 per classroom.

- **Housing**

Majority of the houses are made of strong materials comprising 40% and followed by light materials which comprises 6% same as the mixed but predominantly light materials and same as living temporarily in salvaged or makeshift materials.

## **Health**

There is a Barangay Health Station in the Barangay where services of a rural midwife are available once a week. The midwife is also responsible for the conduct of various health-related activities such as vaccination and other preventive measures, assisted by 7 BHWs.

## **Solid Waste Management**

In our Barangay the usual solid wastes disposal is dumping in the compost pit and segregation of waste materials such as degradable and bio-degradable, the plastics are separated for they can be sold.

## **Sports and Recreation**

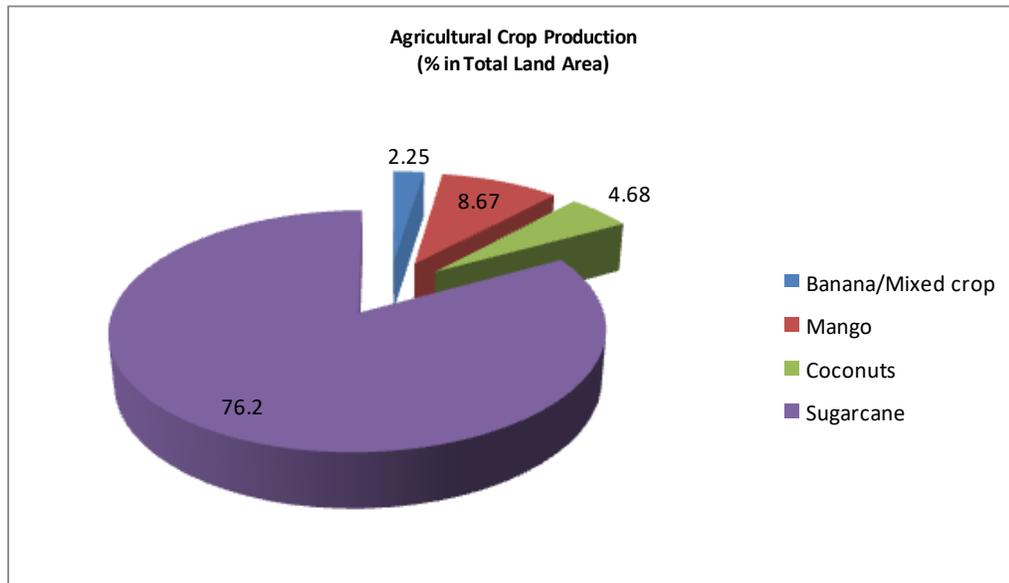

There is one (1) CAGAS-LANTACO Gym located within the Barangay hall compound, which serves as the meeting place, Barangay assemblies, basketball tournaments and other sporting activities for the Barangay populace most especially the youth sector.

## **Protective Services**

There are seventeen (17) Barangay Tanods in Barangay San Isidro, all receiving honorarium from the Barangay. Their duty and responsibility is to safeguard and protect the life and properties of the Barangay people.

## A. Economic

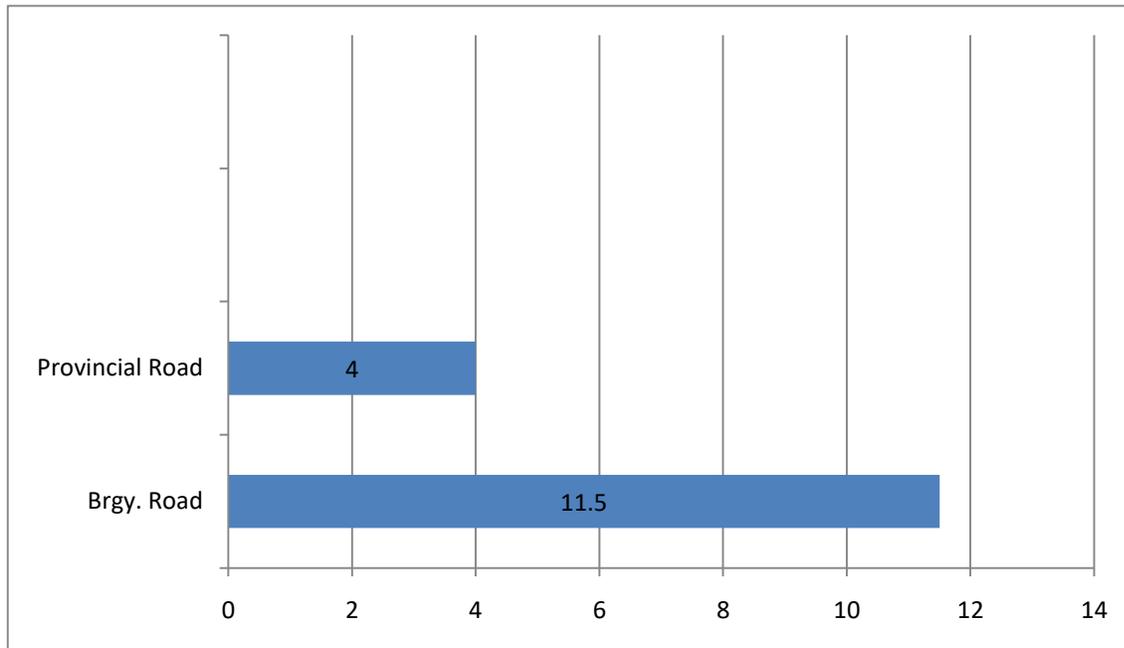

- Agriculture (Crops)

Barangay San Isidro has a total land area of 338 has. Of fertile soil suitable to cultivation of various agricultural crops of which 92.8% are effectively cultivated. The major crops grown is rice bananas, and coconuts.

## B. Infrastructure Transportation

- **Road Network**

The present land area covering the road network of the Barangay stands at 6.86 kms. 4.86 kms. Barangay roads and 2 kms. Provincial road. However, the poor road condition hinders the smooth and fast delivery of farm products to the market.

- **Communications**

Commonly used in the Barangay now a days in communication is mobile phone. These are also used to communicable between the Barangay officials and the Municipal government and other line agencies.

- **Water**

The present sources of water in Barangay San Isidro are level 3 and level 1 composed of Free Flowing, Artesian Wells, Jetmatic/Shallow pumps distributed among the seven (7) puroks. The level 2 waterworks system was funded by DPWH, serving about 20 households.

- **Power**

The power need of the Barangay is supplied by the Davao del Sur Electric Cooperative Incorporated based at Cogon, Digos City, Davao del Sur.

### **C. Natural Environment**

- **Basic Soil Type**

The predominant type of soil in the Barangay is Clay. It is considered to be very suitable to all kinds of agricultural crops.

- **Climate/Rainfall**

Rain usually occurs from May to August due to the northwest monsoon reaches the area from the northeast to east direction. The rain gradually decreases in the later February until the end of April when the transition period between the northeast monsoon and the North Pacific trade winds begin. In May, an increase in rainfall intensities in the area is observed.

- **Erosion Condition**

Accelerated erosion may occur in the Barangay due to improper land use practices.

- **Land Capability**

The land is described as moderately good that can be cultivated safely if carefully planned, combined with conservation practices. These lands require the practice of contour farming and judicious use of lime and fertilizer.

- **Land Suitability**

The greater portion of the total land area of the Barangay is suitable for cultivation of rice.

- **Land Use**

The proposed land use of the Barangay is anchored on the land use needs and potentials. Likewise its role in the overall development of the Barangay has to be defined and substantiated. Hence, the proposed Barangay land use presented, considering the recommended planning standards as well as the legal and physical limitations.

At present San Isidro is expected to improve its agricultural production as inputs to the residents.

- **Barangay Council**

The Barangay serves as the planning and implementing unit of government policies, plans, programs and activities in the community. The Punong Barangay is the head of the Barangay Government, seven (7) members of the Sangguniang Barangay, SK Chairman serve as the ex-officio.

### III. Development Constraints & Opportunities

#### Major Concerns:

##### ❖ **Poverty Alleviation**

- Most of the Barangay population derives their income from agriculture as small landowner cultivators, farm laborers, and leaseholders.
- The seasonal nature of agricultural farm production forced some families to let their children quit or stop schooling in all levels of education.
- The absence or lack of employment opportunities resulted to the outflow of skilled and semi-skilled workers.

##### ❖ **Environment**

- The lack of control and management practices in maintaining the irrigation canal and drainage canal will contribute to a large extent of erosion and flooding problem.
- The absence of proper solid waste management disposal facilities.

##### ❖ **People Empowerment**

- The need for increased involvement and participation of the population in Local governance from needs identification to programs/projects implementation and monitoring.
- Assist the existing non-government and private organization to enable them to maximize and enhance their participation in the over-all Barangay development efforts.

- Motivation of greater and higher social responsibility that people are not only objects but at the same time subjects of development.

#### ❖ **Infrastructure Support**

- The provision of post-harvest facilities to ensure quality and prices prime agricultural commodities.
- Improvement of Barangay and farm to market roads for the fast delivery of farm products.

Analyzing deeper the identified issues and concerns listed above, it would show that the major problem is the declining prevalence of poverty incidence. It may be due to lack of alternative livelihood sources.

## **IV. Land Use**

### **Agriculture:**

- A total land area of 333 hectares shall be utilized for Agricultural uses. This is to ensure sustainability of food production for the needs of the Barangay.

## **V. Proposed Major Programs and Projects**
