

EXECUTIVE SUMMARY

Kibuaya, Hagonoy, Davao del Sur
CY 2012-2016

I. VISION

A highly-developed barangay having sustainable resources, with healthy, responsible and God-fearing citizenry leaving in a peaceful, orderly and ecologically-balanced society.

MISSION

It is a commitment of the barangay government to provide adequate infrastructure, enhance agricultural production through modern technology so as to provide progressive, peaceful, and reputable community with active participation, coordination of all stakeholders in the community.

II. BRIEF SITUATIONER

Demography

- Population

Population Growth and Trend

As of 2011 Barangay Survey, Kibuaya has a total of One Thousand Eight Hundred Fifty Two (1,852) population. The population growth rate of the Barangay had gradually increased until 2016 it is projected to reach around 1952 partly contributed to the increase of population are due to lack of massive and intensified campaign on population control program.

- **Labor Force**

The labor force is projected to increase yearly as shown in the chart above. With the nature and type of economic activities presently available in the Barangay, it would mean tremendous increase in the number of unemployment that in the labor force and while economically active yet unemployed. There is therefore need of more employment opportunities and enabling support services for social and economic stability.

- **Social Services**

- **Education**

There were 634 school age population were enrolled in elementary, high school and college education. The Barangay projected that the enrollees for the next year will increase. We have one (1) complete elementary school with a ratio of 50:1 per classroom.

- **Housing**

Majority of the houses are made of strong materials comprising 13.39% and followed by light materials which comprises 12% same as the mixed but predominantly light materials and same as living temporarily in salvaged or makeshift materials.

No. Of Household by Tenure Status

Health

There is a Barangay Health Center in the Barangay where services of a rural midwife are available twice a week. The midwife is also responsible for the conduct of various health-related activities such as vaccination and other preventive measures, assisted by 5 BHWs.

Solid Waste Management

In our Barangay the usual solid wastes disposal is dumping in the compost pit and segregation of waste materials such as degradable and bio-degradable, the plastics are separated for they can be sold.

Sports and Recreation

There is one (1) ALBERCA-CAGAS-FUENTES Gym located within the Barangay hall compound, which serves as the meeting place, Barangay assemblies, basketball tournaments and other sporting activities for the Barangay populace most especially the youth sector.

Protective Services

There are seven (19) Barangay Tanods in Barangay Kibuaya, all receiving honorarium from the Barangay. Their duty and responsibility is to safeguard and protect the life and properties of the Barangay people.

A. Economic

- **Agriculture (Crops)**

Barangay Kibuaya has a total land area of 566 has. Of fertile soil suitable to cultivation of various agricultural crops of which 95% are effectively cultivated. The major crops grown are bananas, sugarcane, coconuts and mango.

B. Infrastructure Transportation

- **Road Network**

The present land area covering the road network of the Barangay stands at 23.12 kms. 17.12 kms. Barangay roads and 6 kms. Provincial road. However, the poor road condition hinders the smooth and fast delivery of farm products to the market.

- **Communications**

Commonly used in the Barangay now a days in communication is mobile phone. These are also used to communicable between the Barangay officials and the Municipal government and other line agencies.

- **Water**

The present sources of water in Barangay Kibuaya are level and level 1 composed of Artesian Wells, Jetmatic/Shallow pumps distributed among the seven (7) puroks. The level 2 waterworks system was funded by DAR-ADB, serving about 100 households.

Water Supply Resources

- **Power**

The power need of the Barangay is supplied by the Davao del Sur Electric Cooperative Incorporated based at Cogon, Digos City, Davao del Sur.

Power Source

C. Natural Environment

- **Basic Soil Type**

The predominant type of soil in the Barangay is Loam. It is considered to be very suitable to all kinds of agricultural crops.

- **Climate/Rainfall**

Rain usually occurs from May to August due to the northwest monsoon reaches the area from the northeast to east direction. The rain gradually decreases in the later February until the end of April when the transition period between the northeast monsoon and the North Pacific trade winds begin. In May, an increase in rainfall intensities in the area is observed.

- **Erosion Condition**

Accelerated erosion may occur in the Barangay due to improper land use practices and hilly portion.

- **Land Capability**

Soil depth is ranging from deep to moderately deep and from slow to moderately rapid permeability.

- **Land Suitability**

Can be cultivated safely but needs drainage in addition to good management practices to maintain productivity; proper drainage & irrigation system are recommended.

- **Land Use**

The proposed land use of the Barangay is anchored on the land use needs and potentials. Likewise its role in the overall development of the Barangay has to be defined and substantiated. At present Kibuaya is expected to improve its agricultural production as inputs to the residents.

- **Barangay Council**

The Barangay serves as the planning and implementing unit of government policies, plans, programs and activities in the community. The Punong Barangay is the head of the Barangay Government, seven (7) members of the Sangguniang Barangay, SK Chairman serve as the ex-officio.

III. Development Constraints & Opportunities

Major Concerns:

❖ **Poverty Alleviation**

- Most of the Barangay population derives their income from agriculture as small landowner cultivators, farm laborers, and leaseholders.
- The seasonal nature of agricultural farm production forced some families to let their children quit or stop schooling in all levels of education.
- The absence or lack of employment opportunities resulted to the outflow of skilled and semi-skilled workers.

❖ **Environment**

- The solid waste system in the barangay is still an individual household concern, with wastes dump in backyard compost pit. Waste segregation is not implemented although awareness and barangay orientation activities conducted, presence of Barangay Materias Recovery Facility and barangay solid management committee was organized

❖ **People Empowerment**

- The need for increased involvement and participation of the population in Local governance from needs identification to programs/projects implementation and monitoring.

- Assist the existing non-government and private organization to enable them to maximize and enhance their participation in the over-all Barangay development efforts.
- Motivation of greater and higher social responsibility that people are not only objects but at the same time subjects of development.

❖ **Infrastructure Support**

- The provision of post-harvest facilities to ensure quality and prices prime agricultural commodities.
- Construction and Improvement of Barangay farm to market roads for the fast delivery of farm products.
- Analyzing deeper the identified issues and concerns listed above, it would show that the major problem is the declining prevalence of poverty incidence. It may be due to lack of alternative livelihood sources.

IV. Land Use

Agriculture:

- A total land area of 566 hectares shall be utilized for Agricultural uses. This is to ensure sustainability of food production for the needs of the Barangay constituents.

V. Proposed Major Programs and Projects

1. Economic

- Trainings and Seminars for Farmers
