

Foreword

The destiny of any Local Government Units (LGU) depends greatly on its people. Public officials are installed by the people hoping that progress and development of their respective locality, could somehow provide comfort and economic stability.

One of the many indispensable management tool for the development of the LGU is the Municipal Comprehensive Development and Land Use Plan (MCD-LUP). This document serve to guide and chart the development of the LGU in a sustainable, efficient, effective and transparent manner. The plan is fundamentally based on the inherent attributes of the municipality such as its people, land and water resources and socio-economic profile.

As mandated by RA 7160, preparation and formulation of the MCDP-LUP is a must for every LGU to enable itself to pursue its own development aspirations with their own initiative and resources, in line with the overall developments goals and policies of the national government.

It is hoped that this planning document shall be perused and utilized by the local government stewards for the purpose it is intended to.
